PORTFOLIO PROJECT

Build Your Custom Burger ReactJS App

- Website URL: **https://berezka-creator.github.io/burger-app/**
- Source code: **https://github.com/Berezka-creator/burger-app**

WEBSITE DEVELOPMENT EXPERIENCE

WordPress Developer | SF Living Wage Coalition | San Francisco, CA | Sep 2020 – Dec 2020

- Developed a new website from scratch for the Film Festival using WordPress.
  https://www.csej.org/
- Collaborated with team members to ensure a positive user experience.
- Researched relevant designs that fit the website and presented it to the team with recommendations.
- Maintained Sf Living Wage's home website; fixed the auction module and other bugs as needed.

Front End Developer | Code for SF | San Francisco, CA | June 2020 -August 2020

- Contributed to the SF Bay Area Relief web application using React. It provided a database for non-profits to search for grants and loans relevant to their organization.
  https://github.com/sfbrigade/datasci-bay-area-relief-frontend
- Worked collaboratively with other development teams.
- Built the test code for each React component.

OTHER WORK EXPERIENCE

Digital Marketing Associate | Partita Custom Jewelry, San Francisco | 03/2018 – 03/2020
- Developed the store's website using Shopify and improved SEO analytics based on the company's mission and the target audience.
- Managed social media channels including Facebook, Instagram, Pinterest, and promoting the store's values and products.
- Managed custom jewelry projects by monitoring and coordinating all customer service processes to ensure customer satisfaction.

Mining Engineer | Iron Ore Mining, Russia | 11/2011 – 05/2017
- Spearheaded a project for mine expansion at Iron Ore Mine that entailed collaborating with other departments with other engineers and ensures clear communication.
- Analyzed and consolidated data from multiple resources; provided drafted correspondence and controlled quality of work to report monthly progress. Analyzed various sites and provided recommendations.
